

Metal Detectable Food Safety Solutions for African Food Manufacturers

Reducing contamination risks. Supporting compliance. Helping manufacturers protect production lines across Africa.

About Filaco Food Safety Solutions

Filaco Food Safety supplies metal detectable products and food safety solutions designed for modern food manufacturing environments.

Working in partnership with established international suppliers, we support manufacturers with practical contamination prevention solutions that help improve food safety processes, reduce operational risk, and support compliance requirements.

As we expand across Africa, our focus is on building long-term relationships with food producers, processors, beverage manufacturers, and packaging operations that value quality, reliability, and production efficiency.

Our Focus

- Food safety support
- Contamination prevention
- Production line efficiency
- Compliance-focused solutions
- Reliable industrial supply partnerships

The Challenge Facing Food Manufacturers

Modern food manufacturers face increasing pressure to maintain strict hygiene and contamination control standards while keeping production lines running efficiently.

Even small contamination incidents can lead to:

- Costly product recalls
- Production downtime
- Failed inspections or audits
- Damage to brand reputation
- Supply chain disruptions
- Increased operational costs

As food safety standards continue to improve across Africa, manufacturers need reliable, practical solutions that integrate into daily operations.

Our Solution Approach

Filaco Food Safety focuses on supplying practical solutions that support contamination control and operational efficiency in food production environments.

Our solutions are designed to help manufacturers:

- Reduce contamination risks
- Improve visibility of foreign object control
- Support HACCP and food safety systems
- Minimise production interruptions
- Improve inspection readiness
- Strengthen quality assurance processes

We understand that food safety solutions must work reliably in real production environments — not just on paper.

Product Categories

We supply a range of metal detectable and food-safe products suitable for food manufacturing and processing facilities.

Product Range Includes:

- Metal Detectable Stationery Including Pens and Calculators
- Metal Detectable First Aid Products Including Plasters and First Aid Kits
- Metal Detectable Tools Including Safety Knives and Cable Ties
- Metal Detectable Personal Protective Equipment (PPE)
- Metal Detectable Traceability products
- Metal Detectable Engineering Products
- Metal Detectable Test Pieces
- Metal Detectable Food Preparation Tools Including Jugs and Scrapers

Metal Detectable Stationery

Metal Detectable First Aid Products

Metal Detectable Tools

Metal Detectable PPE

Metal Detectable Traceability

Metal Detectable Engineering Products

Metal Detectable Test Pieces

Metal Detectable Food Preparation

Industries Supported Among Others

- Food manufacturing
- Dairy processing
- Beverage production
- Milling and grain processing
- FMCG production
- Pharmaceutical Industry
- Export-focused food production

Supporting Food Manufacturers Across Africa

Africa's food manufacturing sector is growing rapidly, with increasing focus on:

- Food safety compliance
- Export readiness
- Quality assurance systems
- International manufacturing standards

Filaco Food Safety aims to support manufacturers across the continent with practical, dependable solutions suited to both established and emerging production environments.

Why Work With Filaco Food Safety

Practical Industry Understanding

We understand the operational realities of food manufacturing environments and the importance of minimising disruption while maintaining safety standards.

International Supply Partnerships

Our relationship with established international suppliers allows us to provide reliable products suited to modern food production facilities.

Long-Term Partnership Approach

We aim to build lasting relationships with manufacturers, quality assurance teams, procurement departments, and operational managers across Africa.

Responsive Support

We focus on responsive communication, product guidance, and helping clients identify practical contamination prevention solutions.

Let's Start the Conversation

Whether you are improving contamination control processes, strengthening food safety systems, or expanding production capabilities, Filaco Food Safety is ready to support your operation.
